

## How can authors contribute their research to *EDQ*?

*Economic Development Quarterly* is basically geared to North American economic and workforce development and revitalization; however, international perspective is welcome and encouraged. *EDQ* will consider studies of economic development in other countries **if the article makes clear its relevance to the U.S. context. Relevance to the U.S. context is not established by adding on a short section at the end; it must be integral to the article.**
